

Alliance for Renewable Energies: aream and Capital Nature sign cooperation agreement

Düsseldorf, 16 June 2020 – aream and the Israeli firm Capital Nature Ltd. will together support young companies via private equity to make use of new technological opportunities in the field of renewable energies and sustainable energy infrastructure. The two companies signed a cooperation agreement for this purpose on June 8, 2020. “This cooperation gives international high-tech companies access to the European market – and European investors the opportunity to invest via private equity in the booming sector of renewable energies/sustainable infrastructure”, says Markus W. Voigt, CEO of aream Group.

In the past years Capital Nature has been very successful in searching, finding and developing new technologies and projects in the field of renewable energies/sustainable infrastructure. “We help company founders turn good ideas into a viable successful company”, says Anat Tsour Segal, CEO of Capital Nature. Capital Nature provides both equity and strategic advice and in turn takes a stake in the companies.

aream will act as Business Development Partner for Germany and Continental Europe. “We offer our investors access to a very interesting business model in a booming sector with very good return chances”, says Voigt. aream will also support the next capital increase of Capital Nature Ltd. and offer investors the opportunity to enter the market as well as invest in Capital Nature itself.

“The goal is to make the enormous technologically innovative power of the companies from Capital Nature’s portfolio accessible to German and European investors”, says Voigt. “After all, investments in renewable energies and sustainable infrastructure are no longer only possible through participation in solar or wind farms.” For the risk tranches of institutional investors in particular, there is an increasing demand for investment opportunities in the private equity sector.
