

aream expands Lauda wind farm

Düsseldorf, April 09, 2024 - When it comes to wind power, Germany is lagging far behind the targets set by politicians. aream and Juwi are now contributing to the expansion of capacities by adding an additional turbine to the Lauda wind farm. It is being acquired by aream's Clean Energy Future Fund. "Our fund is thus consistently pursuing its goal of increasing the production and availability of renewable energies and thus contributing to the reduction of greenhouse gas emissions," comments Markus W. Voigt, CEO of the aream Group.

The additional turbine is a V162 from Vestas. With its acquisition, aream is expanding its self-managed Lauda-Heckfeld wind farm in the Tauberbischofsheim area, which previously consisted of two V126 3.45 MW turbines. The turbines are connected to the grid via a shared infrastructure. The buyer and operator of the turbine is the Clean Energy Future Fund (CEFF), an aream fund focusing on renewable energies.

The Vestas turbine has a rated output of 5.6 MW and a hub height of 169 meters. The expected annual energy yield is around 13 GWh. Commissioning is scheduled for the end of April 2024. For this project, aream is once again working with the project developer Juwi, which developed the site and is overseeing the construction of the turbine. "Even after the expansion, Juwi will remain the technical operator of the park," explains Voigt.

About the aream Group

aream Group, founded in 2005, is an investment and asset manager for institutional investors and industrial clients with a focus on sustainable infrastructure in the renewable energy sector. With its three divisions Fund and Asset Management, Project Development and Operation Management, aream covers the entire value chain for renewable energy investments. With a transaction volume of more than 2.5 billion euros, aream is one of the leading asset managers in this market, and its own portfolio of plants generates around 40 million euros worth of green electricity per year. Since 2008, aream has produced more than one billion kWh of green electricity. As part of the growth strategy, several solar and wind parks are to be realized or acquired in the coming years. Through its own project development alone, aream currently has a long development pipeline with great potential. Further information: www.arem.de.

About the JUWI Group

The JUWI Group has been one of the leading specialists for renewable energies for almost 30 years and offers complete project development and other services related to the planning, construction and operational management of renewable energy plants. The business areas mainly include projects with wind and solar energy as well as hybrid systems with storage for industrial applications. The company belongs to Mannheim-based MVV Energie AG, one of the largest municipal energy suppliers in Germany. To date, JUWI has implemented more than 1,250 wind energy plants with a capacity of about 3,000 megawatts at around 250 locations worldwide and around 2,000 PV plants with a total capacity of around 4,000 megawatts. JUWI's operational management manages wind energy and photovoltaic plants with a capacity of more than 4,100 megawatts. JUWI has initiated a total investment volume of more than ten billion euros for the realization of energy projects.
